

FEEDMASTER™

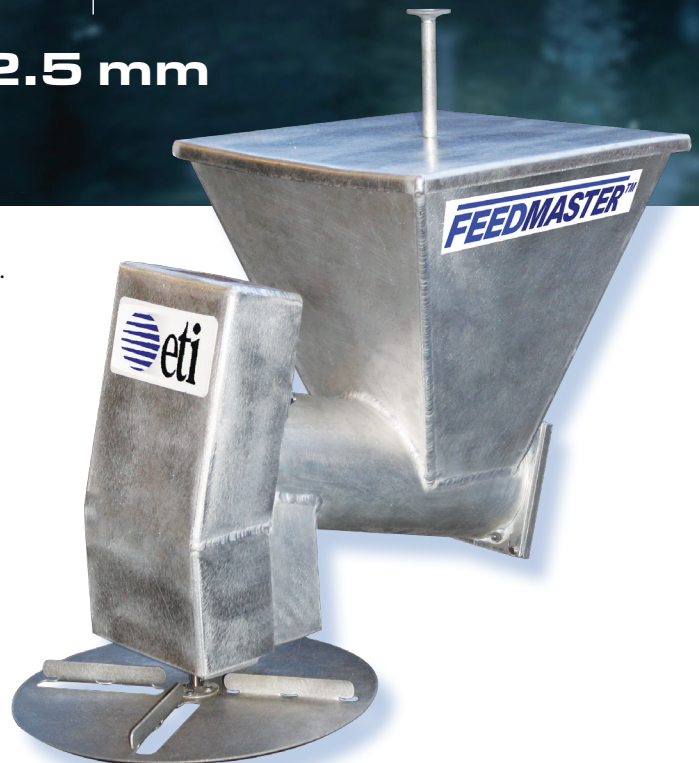

AUTOMATIC BROADCAST SPINNER WITH METERED DOSING

Operationally simplistic and technologically advanced... This state of the art automated first-feeder/spreader gives your fish access to precise dosage and cleaner water due to minimized waste. This translates into increased energy, greater vitality and better resistance to disease for a vigorous and healthier start to life.

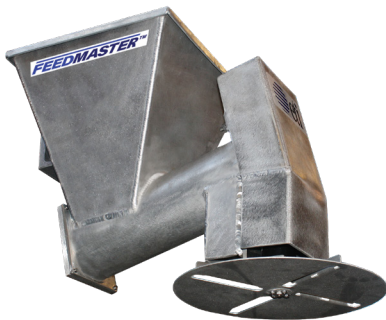

Environmental Technologies Inc.

FEATURES:

- Indoor automatic feeder
- Can be used by itself or connected to a Feedmaster centralized system
- Used for granules and pelletized feed
- Visible feed level gauge
- Non-clogging auger
- Easy to clean

ADVANTAGES:

- Improve the Feed Conversion Ratio (FCR)
- Well-nourished and homogeneous fish
- Accelerates Sustainable Growth Rate (SGR)
- Minimum loss of food
- Minimum maintenance

TECHNICAL SPECIFICATIONS:

- Made of corrosion resistant material
- Hopper capacities: From 5.0-40 Kg.
- Powered by 110-220 VAC and 24 VDC
